

# 6 REASONS

## To migrate to Vantage Cardiff colocation

### 1 FOCUS ON YOUR CORE BUSINESS

Digital infrastructure is critical to today's business, trust the experts to house your IT in highly resilient colocation.

### 2 MITIGATE RISK

On-premise data centres can be more likely to suffer an outage or serious incident than a purpose built colocation facility.

### 3 INCREASE SCALABILITY

With 270MW and a 50 acre campus, we will ensure that your business isn't limited by your data centre capacity.

### 4 PROTECT YOUR BUSINESS

Improve information security and reduce risk of data loss with our highly secure, professional colocation.

### 5 IMPROVE ENERGY EFFICIENCY

On-premise data centres are considerably less sustainable than migrating to our colocation with 100% renewable power.

### 6 REDUCE COST

Dramatically reduce total cost of ownership by moving to our purpose built colocation. Cut on-premises costs for insurance, maintenance and support contracts.
